

Leader's Guide

January 2026

**A comprehensive guide to leading
Freedom Fight groups.**

Introduction

Welcome to the Freedom Fight Leader's Guide! Helping men and women find freedom from pornography and other unwanted sexual behaviors has never been more urgent in our history than it is today. Satan is using porn to steal people's joy, kill their intimacy, and destroy marriages. However, we believe God is using the process of outgrowing porn as an opportunity for revival and growth! We have seen so many men and women emerge from the Freedom Fight program more emotionally aware, committed to holiness, and secure in their identity in Christ.

Outgrowing a porn addiction is not just about stopping the behavior. As we help others address the roots of their addiction, we are presented an opportunity for deep discipleship.

Our program is 60+ video lessons and Bible studies that will address the six roots of a porn addiction in a holistic way. Your group will grow in their commitment to holiness, emotional awareness, and identity in Christ while also learning how to rewire their addicted brain using God's truth and addressing their past trauma and shame. The path to freedom is not easy, but with God's grace, freedom is possible and you can help your group experience true, lasting freedom.

We want to encourage you in your willingness to lead/facilitate a Freedom Fight small group. The Church needs more men and women willing to invest in God's Kingdom in this way. Launching your first group can seem daunting. It is important to remember that your job is to facilitate and provide accountability and encouragement to group members. Fortunately, you do not have to have all of the answers. You can be a fellow learner as you follow this Leader's Guide every week. We will walk you through the key steps needed to launch your group effectively, offer some helpful tips, and equip you to confidently use the Freedom Fight program in your ministry to help men and women break free from the bondage of porn.

How to Use This Guide

This leader's guide is a comprehensive guide to leading a Freedom Fight small group. As the group leader/facilitator you will be leading the discussion every week, setting boundaries, and assigning outside work. In the following sections, we will teach you how to start a group and implement a group format. We will also share key tips for leading a successful group. We will provide a weekly guide that you can follow from the first group meeting to the last.

After reading about how to start your group, you can begin to use the weekly guide starting on page [14](#). The guide will provide a road map and give you confidence as the group leader. If you have ever led a Bible study, you can lead a Freedom Fight group! Simply follow the group format discussed in the next section and be a good listener and encourager. As the leader, it is critical that you come to group just as prepared as your group members. Watch the videos and fill out the Study Guide each week. Being a fellow learner will help you grasp the content and enable you to provide valuable insights for your group members.

Starting Your Group

1. Get Started

As a leader, you will need to get familiar with the Freedom Fight program. Once you have finished reading through the "Starting Your Group" section, the best way to get familiar with the program is to download the Freedom Fight app and start using it.

2. Pray

Pray for your group regularly and ask God to do what only He can do. Ask him to use your willingness and leadership to change lives (Psalm 127:1-2). A critical step to leading a successful group is to understand that only God can change your group members' lives. A common mistake that group leaders make is measuring their worth or success by how their group is doing. Group leaders need to commit to their group, pray earnestly for them, and be faithful to them. The Lord will do the rest.

3. Use the Freedom Fight Group Format

Part of leading an effective group is having a plan for each week. The recommended meeting time for groups with 4-5 members is 1.5 hours. For groups with 6 members,

we recommend an hour and forty-five minutes. If groups have more than six members, we recommend splitting into two smaller groups for the Weekly Check-In process and coming back together for the content discussion. For your weekly meeting, we recommend the following format:

Discuss Weekly Check-In (45 mins)

Each weekly meeting will start with each group member talking through their Weekly Check-In (located on the Home Dashboard of the FF App). Group members will do Daily Check-Ins (see page [8](#) on Using the FF App) which will populate the Weekly Check-In. Then he or she will answer questions evaluating his or her lowest day of the week. This will grow the member's emotional intelligence and awareness. Group members should complete the Weekly Check-In within 24 hours before the group meeting begins. For Check-Ins, it is important that your group size is limited to six total members. Otherwise, you will need to extend the length of the group meeting. A porn/sex addiction isn't just about sex, it's about how we have learned to medicate stress, pain, and negative emotions in our lives. If a man or woman can't understand and communicate his or her emotions, he or she will never be able to stop medicating his or her life with unwanted sexual behaviors. We have to be able to communicate to others and to God how we feel and why we feel that way.

Paul commanded us in 1 Timothy 4:7 to "...train yourself to be godly." God calls us to be godly and to train ourselves to that end. Though training in spiritual disciplines is essential, this verse is about more than just that. Paul commanded the church in Corinth, "Let us purify ourselves from everything that contaminates body and spirit, perfecting holiness out of reverence for God" (2 Corinthians 7:1). Over time these Check-Ins are going to give group members a greater awareness of the unholiness in their hearts and how they are medicating their lives with sex! Each group member should get 6-8 minutes to Check-In (For the first few weeks, consider utilizing a stopwatch to help train the members in the group to stick to the Check-In and not get off track). As the leader, you may need to ask a follow-up question or two if group members are being vague or if you've noticed a pattern in their Check-Ins (i.e., I noticed on your Check-Ins every weekend you're stressed, what's causing that?).

Discuss the Content (40 mins)

Each week as the leader/facilitator you will lead the discussion of the videos and Bible studies. We recommend that you follow the weekly guide starting on page [14](#). It has a recommended weekly video schedule, discussion questions, and homework

that should be assigned. You may not be able to ask every single question, but you can pick and choose or add questions of your choice. To maximize your time in the group, we recommend that group members watch the videos and fill out the Study Guide and Bible study before the group meeting begins. If you follow this guide, it will take you 30 weeks to complete the course. As the group leader, you may find you need to spend an extra week discussing portions of the content. We encourage leaders to do this if needed, especially with the 10 Worst Moments exercise. The content within these videos will drastically influence your group's Check-Ins over time. Members will gain greater insight into how their unwanted sexual behavior has affected so much of their lives.

Commitment to Change (C2C) (5 mins)

At the end of each group, every group member should submit a Commitment to Change (C2C) in the Weekly Check-In section in the Menu of the app. After the C2C is submitted, it should be voiced out loud. Try to guide individuals in the group to make C2C's related to the core applications and practices that are highlighted at that point in the program. Once Double Binds (DB) are introduced, facing the DB can also be a good practical C2C for members to make. In the beginning, it is common for group members to choose a vague C2C. For instance, "I'm going to read more this week" or "I'm going to check in every day this week" are not great C2C's because they are not specific or measurable. It is not necessary to correct group members if this is what their C2C is, but it is your job to challenge them to make specific changes so that other group members can effectively keep them accountable.

4. Ask Everyone to Commit to Confidentiality

You can't have an effective group without honesty, and you won't have honesty without confidentiality. Each person needs to know that whatever is shared in the group will stay in the group. Confidentiality of course can't be maintained if there is an issue of self-harm or a concern about abuse, so mention those exceptions on the front end. You can print out the Commitment to Confidentiality document found in the Resources section of the FF App.

5. Maximize the Power of Check-In Phone Calls

In a Freedom Fight group, each person should be making at least three phone calls to other group members each week, with a daily call the goal. You will need to encourage them frequently at the beginning of the group to help them build the

habit. Here are a few ground rules to help your group members maximize Check-In phone calls:

1. Calls are 2 minutes or less. Concise and purposeful.
2. Content of the call: the caller should identify where they are on the FASTER Scale, why they are there and what they need to do to return to restoration (address the Double Bind). Before we introduced the FASTER Scale in Week 2, they will just identify their emotions, the source of their emotions, and how to return to restoration.
3. If no one picks up when they call, they should leave a voice message where they check in and process like they would if someone answered.
4. The receiver of the message replies with a text or call acknowledging receipt of the message.
5. The receiver of the Check-In phone call doesn't typically reciprocate and Check-In themselves. It's important for people to practice breaking isolation by initiating the call. We also want people to think through their call instead of just winging it on the spot.

Keys to Leading a Group

1. Keep the Group on Track

It is difficult to have a group that meets for less than 1.5 hours unless you shrink the content discussion to less than the recommended lessons. The ideal size of a small group is 4-6 participating members. If group members get off topic during the check-in time or take too much time, then set a time limit for each person to have 6-7 minutes to speak. Some groups use a timer to help everyone stay on track. During Weekly Check-Ins and crash reports, encourage your group members to read what they have already written to help keep your group on track.

2. Model Authenticity

As the leader, you need to model authenticity. If you are walking in freedom, you can join your group as they check in and make accountability calls. If you feel the need to maximize time for your group members to share during group time, you can instead stay accountable to someone outside of your group. If you are currently not walking in freedom, share that with the group and let them know you will be checking in with a different group.

3. Emphasize the Importance of Check-Ins

Group members should be checking in on the website/app daily and making at least three or more accountability phone calls weekly. Group members should be getting each other's Daily Check-In reports within the small group chat. Checking in is one of the Core Habits that lead to freedom, so make sure it is happening at an effective level. If group members are not making their phone calls, you may need to assign who they call. Typically, group members will pair up, but they may need some help in the early weeks to build the habit. See the Using the FF App starting on page [8](#) to learn how to complete the Check-Ins.

4. Maximize the Group's Learning

We suggest having the group watch the videos on their own and respond to the weekly questions before the group meeting begins. This gives them the chance to internalize the content on their own and then discuss it with the group later. If a group member is not watching the lessons or doing the Biblical Insights, core applications and practices, the impact of the program is severely limited in that member's life.

For each lesson, the Freedom Fight Study Guide has a note-taking outline and Bible verses that bring Biblical wisdom concerning the lesson. This has proven to be a powerful tool as it undergirds each lesson with the authority of God's Word. Those who utilize the Study Guide retain much more from a given lesson and contribute more to the group. Encourage each group member to utilize the Study Guide! It will make a significant difference for both the group and the individual. There is a writable [Study Guide](#) in the resource section to download or you can purchase a hard copy from Amazon.

5. Coach Your Group When Needed

Finding freedom from porn will likely be one of the hardest things your group members have ever done. Encourage each group member within his or her progress; you will often see it before they do. If they are slacking, challenge them to do the work of recovery. They will need both encouragement and spurring to get the most out of the program (Hebrews 10:24-25).

6. Utilize My Groups and Messages in the FF App

The My Groups Portal is under the Menu in the FF App and gives leaders access to your group members' progress in the program. Once you create a small group and invite each group member, they will need to confirm their group invitation by email. Then you will be able to see their latest Check-Ins and the lessons they have completed. When needed, you can remind them about finishing a particular element of the program before your group meets.

Once you have created a small group, a group chat will be created in the Messages tab. All notifications from group members will be sent into this chat. Utilize the chat to respond to and encourage group members. As the leader, if you send a Check-In or crash report, those notifications will not be sent to your group members. However, if you choose, you can opt-in for all notifications to be sent to your group members by electing to Share Data.

Launch Your Group

You are all set to launch your first Freedom Fight group! Your next steps to get your group off the ground is to set a weekly time that each group member can attend, then choose a start date. For the first meeting, make sure you have downloaded the Freedom Fight App and are familiar with it. For the first week, print out and bring the Commitment to Confidentiality for each group member to sign. For online groups, have each group member email you a signed Commitment to Confidentiality.

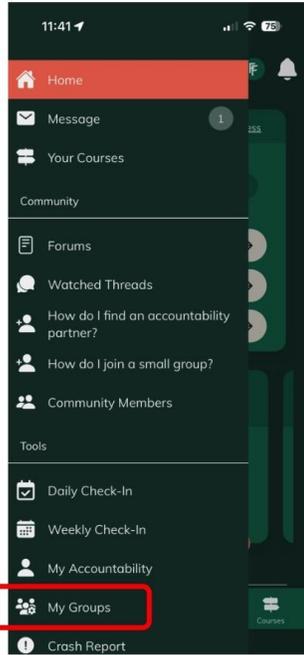

Utilize the weekly guide and turn to page [16](#) to view week one which walks you through the main points to launching your group!

About the Freedom Fight

The Freedom Fight was founded by Ted Shimer, who graduated with a Master of Biblical Studies (MABS) from Dallas Theological Seminary. Ted is a Pastoral Sex Addiction Professional Supervisor (PSAP-S). His training was through IITAP, the organization of world renown sex addiction authority Dr. Patrick Carnes.

Ted has disciplined college students professionally since 1991 with the collegiate Christian ministry Student Mobilization. Helping young men overcome the bondage of pornography has been a part of his mentoring from the beginning. But it was the epidemic level of porn addiction on the college campus, combined with the lack of effective, affordable and biblically based recovery options that gave birth to The Freedom Fight. Through the collective experience of Ted and his team, the principles of recovery and discipleship that lead to freedom became clear. They are passionate about helping others understand and apply these principles so they can find freedom.

The Freedom Fight is the low cost porn recovery program that blends brain science, clinical practices, and biblical wisdom to help men and women find freedom. We understand the full spectrum of factors that drive compulsive porn use — physical, emotional, mental, and spiritual. For anyone ready to be free of the destructive power of pornography, the Freedom Fight delivers breakthrough insights, practical tools, and step-by-step training to guide you.
